

Andre Boudreault - 00:02

Not bad. Sorry, my camera was off. Don't know why.

Tiffanie | Project Manager - 00:05

Yeah, I can't see you. By the way, I have one headphone in. I lost the other one down the elevator days ago.

Andre Boudreault - 00:16

Trying to get my camera to work.

Tiffanie | Project Manager - 00:18

Yeah, I'd love to see your face.

Andre Boudreault - 00:21

It's coming. It's coming. I got it. Okay. So not coming on. Hello? What is this? This has got to be Google. This Google.

Tiffanie | Project Manager - 00:38

This is zoom.

Andre Boudreault - 00:40

Zoom. It's even worse if you want. Why is it not going on?

Tiffanie | Project Manager - 00:45

You can.

Andre Boudreault - 00:45

I keep trying to turn it on and it keeps telling me to.

Tiffanie | Project Manager - 00:48

Oh, now I see you.

Andre Boudreault - 00:50

There we go. Yay. We have liftoff.

Tiffanie | Project Manager - 00:57

It's so good to see you. Tell me. Good. Really, really good. Yeah, I took about almost a full week actually to just, like, do some stuff at home that I've been kind of like, not doing. And it was nice. It was a nice little reset. How about you? How have you been?

Andre Boudreault - 01:14

Where the heck are you?

Tiffanie | Project Manager - 01:16

You know the coffee shop right on the canal next to where I live?

Andre Boudreault - 01:20

Yes, yes. I know it. Okay.

Tiffanie | Project Manager - 01:23

And there's never anyone here, so it feels like a private office.

Andre Boudreault - 01:28

Yeah, that's wicked cool. That's nice. Good for you.

Tiffanie | Project Manager - 01:32

My modem at home needs to be replaced and they're giving me a bit of a hard time with, like, when to come and set it up and what product. And my account is very old, so they want me to upgrade to another account. So I just came here so that I can be on really good wi fi and then we can. I have a few meetings today and then I'll figure out the modem thing later on today.

Andre Boudreault - 01:55

Right, right. Okay.

Tiffanie | Project Manager - 01:57

So tell me what's new with you? How are you doing?

Andre Boudreault - 02:02

Wow, let me see. Medbox supposedly wants to be live July 1st.

Tiffanie | Project Manager - 02:12

Med box. What do you mean?

Andre Boudreault - 02:15

I did all their software for the medicine box. They're ready to go Friday. He's bringing me that kiosk thing there, the Samsung kiosk. Make it work on that, which I've already done the work. I just did the testing. The tablets are up, the POS is up, his server is up. The online ordering is ready to go. The picker app or prepare app, when they prepare the weed and stuff that's ready to go, images are in there. All the special weed stuff like THC composition, flower type and all that funky stuff is in there. I didn't know he had a warehouse, so I actually had that warehouse in there. Revamped the whole back office system because he's not really going to use the head office system at all because it's all local. So I had to revamp that whole part of the software for him.

Tiffanie | Project Manager - 03:18

Wow. Okay. That was a lot of work.

Andre Boudreault - 03:22

No, no, it's been a big job. I did an evaluation. I sent it to Mike and Matt of the value of the software and what it is, and we're talking half a million is the value of what I wrote for them. You know, hey, yeah, yeah, yeah. And then now. Yeah. And then I've got UPS going. They're. They're idiots, but that's fine.

Tiffanie | Project Manager - 03:50

So I did what audit, by the way? In the end, on your end, is everything okay? Did they come back and want a whole bunch of other things from you?

Andre Boudreault - 04:00

Nothing going on with Loa or Littletree. Everything's perfect. There's two outstanding things with Little Tree, though. They have that outside POS they want to put near the gas pumps. And that's been, I don't know, a month and a half waiting for that. I don't know what's up with Rebecca to get it going or what's going on there. And the other thing is the integration to Vape King. When they buy vapes, she has to change. She has to put the vacant product codes in the system. There's like, I don't know, 40% of them missing. So I can't really do an integration for

her until she does the work. I can't do the work for her. I don't know what this product is. You tell me. So those are the two outstanding things from. From the Little Tree and Lahore side. But I get zero calls.

 Andre Boudreault - 04:59

And then the. Has implemented touch screens for the pos. They love it. So I had nothing to do there. I just said, plug it in, you know, but they're all excited about it. There'll be one more thing I'll do for medicine Boxes, because what happens is that people wait around in the waiting room for. Prefer their stuff to get ready. And I want to do kind of an airport like, arrival departure screen that says, hey, Bob, your order is pending. Your order is being prepared. Hey, Bob, your order is ready. So they can just look up at a TV monitor, because he's got three monitors up there. So I was throwing the idea at him. I said, you know, it'd be really fun if we could, like. And I gave him the example of an airport and he caught on right away.

 Andre Boudreault - 05:52

Yeah, that would be cool. It's not a must have to go live, but it's something I want to.

 Tiffanie | Project Manager - 05:57

Do from a client experience perspective.

 Andre Boudreault - 06:00

Right, that's it. They're all in the waiting room. So I just want everybody to stare at that screen. Anyway, that's just my little thing, you know, my personal little thing.

 Tiffanie | Project Manager - 06:09

Good ideas as usual.

 Andre Boudreault - 06:11

Yeah, UPS wants to upgrade from SQL 2014 to SQL 2022. Oh boy, over 400 stores. So I put out. I don't understand people like this has been in the works since January and she was supposed to phone me two weeks ago. Didn't happen. So I sent off an email and said, look, I said, are we meeting on this? What do you want to do? She didn't get back to me. So I put together a document. I said, by the way, it's going to cost eight grand and let me know she gets back to me yesterday. She goes, I'm available June 22nd between 11 and 3, believe it or not, I wrote back to her. I don't believe we need a meeting. I sent you a document with the proposal. Get it approved, I'll start

development. Otherwise, forget it.

Andre Boudreault - 07:00

I'm not trying to schedule a meet. June 22nd. I can't even think that far ahead. So I just said, screw you. And then I have the other department at UPS who wants to implement, you know those customer displays I have at Littletree? They want to implement that down there. Well, did the project get approved? I'm going to charge you 2,500 bucks for this. If not, well, I want to be compensated if you want me to develop the app to demo style, you know. Yep. I have sent her the look of it four times so far in the last six months.

Tiffanie | Project Manager - 07:39

Oh no, four times.

Andre Boudreault - 07:42

She asked for another video of it and they're. Are you effing kidding me? You guys that brain dead. I mean, come on, you know. So I'm starting to say I don't give a f about it. I'm done with these people. You know, it's like, screw you, I don't care. You know, you deal with it.

Tiffanie | Project Manager - 08:02

They're making you do so much work. Around, around.

Andre Boudreault - 08:08

I've got MedBox coming up live. I've got other things happening. I'm there, screw it. I don't have time to waste with idiots, you know. But on another token, because I'm thinking ahead because Mike has this big expansion thing going on that he wants to do. Except that I don't want to deploy source code because everything's in PHP and JavaScript. Right?

Tiffanie | Project Manager - 08:30

Right.

Andre Boudreault - 08:30

I don't want to deploy source code. So now I figured out how to compile php. So it's obscured. It's not really compiled, it's more like obscured. So you can't really figure out what the code is. So then I can deploy.

Tiffanie | Project Manager - 08:46

Okay, good.

Andre Boudreault - 08:47

That's my little pet project. That's my little pet project for now. And that will move me closer to Mike being able to say, okay, I want to hit other communities, but with my solution and my payment integration, because I'm looking, I'm still. That for me is the big project that Mike's gotta focus on at some.

Tiffanie | Project Manager - 09:08

Point, but who knows?

Andre Boudreault - 09:10

But I'm still working towards it is my point.

Tiffanie | Project Manager - 09:13

Love that, love that. That is a big project and he does want to do that. And it goes hand in hand with the new gas solution also. So I think we're about, probably two months away, I think depends on my call at 10. But we're about two months away from being able to generate a lot of clients for this solution. So if we can line things up at the same time, that would be great. But I know for me, Mike wants me to focus this week on a few of the projects. One of them is the payment processing. So I wanted to give you a bit of an update in case you didn't get it from Matt. Did you hear from Matt about Lahore, the payment processing?

Andre Boudreault - 09:54

I'm pushing hard, I'm p. Working hard on that and I'm getting very little information back other than, oh, we had the wrong business number, blah, blah. Okay. But that doesn't do anything for me,.

Tiffanie | Project Manager - 10:05

You know, it's like, really, that's the thing. So I wanted to let you know they've decided to not move forward with the HUA for the new payment processing with Global. And it's to do with the way that they set up their accounts and security and things like that. Like from a legal perspective, it just doesn't work, you know. So we will move forward with Little Tree. And I kind of wanted to ask you if there's anything I need to know or we just sign the document and get that ball rolling.

Andre Boudreault - 10:36

Well, you know, Moneros is in place right now. Okay, I say you sign the document and move forward. Let me get my testing done and make it work and then Mike can make the decision. Do I stay with Moneros, do I go with Global, blah, blah. That becomes his business decision. As long as the software works. I. That's, that's my part, you know, my little slice. And then he's got a business decision to make. However, we can solve the as well. And here's how we're going to do it.

Tiffanie | Project Manager - 11:06

Business name, legally. So it's not going to happen.

Andre Boudreault - 11:10

No, it can't. You guys got to think outside the box. It can happen. Okay. And the way to do it is that you piggyback on Little Tree.

Tiffanie | Project Manager - 11:23

Right.

Andre Boudreault - 11:24

Okay. So you get. You get Global Payments to give you two more terminals for Little Tree. Then you take those terminals and you plug them in. And the web.

Tiffanie | Project Manager - 11:35

I don't know if you know what's going on in the community right now, but there's. Yeah. So Mike wants Little Tree very separate from the very separate. Just to protect Little Tree in case of anything, you know, any big decisions being made within the community. So I love this idea. Let's maybe see how it goes with whatever the chief ends up deciding, you know, and then if Mike wants to, then it makes sense. What you're saying makes sense.

Andre Boudreault - 12:07

Well, yeah, because then because of the terminal id, we can then split out what portion of the cash goes to the 1. What portion goes to Little Tree. Yeah, because we can base the extractions based on terminal id. It becomes just an accounting thing at that point.

Tiffanie | Project Manager - 12:27

Exactly, exactly. I. I think we're a bit far away from getting a decision on that, though, because it's in the hands. It's very political, from what I understand from Mike. So he. Unless something's changed in a week. But he told me a week ago, look, Tiff, we got to separate them. They cannot be close together. Little Tree has to be very independent from all the other businesses.

Andre Boudreault - 12:50

Why does that stop Global Payments for Leroy? I did not understand.

Tiffanie | Project Manager - 12:54

Yeah. So Leroy apparently is under a different business name. And according to Global payments fraud and money laundering legisl legal due diligence. Lahua would not be approved through Global Things because of the type of product and because it was registered under a different name, has a different business account, and yet it's a bit more complex. Matt said no, and then Mike said no. So I'm focused on Little Tree on its own. And that's how we'll move forward with Global Payments.

Andre Boudreault - 13:34

And I'll have a chat with Matt because maybe we can go with Square or another payment processor.

Tiffanie | Project Manager - 13:40

I think right now, like, let's just, you know, maybe we can see what happens back home, legally speaking, with the chief and what his decisions are and what happens with all of the businesses that are tobacco, vape, cannabis. Those are kind of like the. The. You know, the. How do I say? I want to make sure that I'm saying the right things. But I, for Now, definitely, when it comes to the payment processing system, that doesn't want to change it. Neither does Mike. And that might change in two months. It might.

Andre Boudreault - 14:17

That's too bad. Oh, well.

Tiffanie | Project Manager - 14:18

Yeah. But it's okay. So for. For me, I think what I had in my notes. And you might have to catch me up because I feel like it's been a minute and there's been so many things since then. I think there was a problem with my connection to the server. Correct. And that was kind of what was blocking me from being able to get everything.

Andre Boudreault - 14:40

Yeah. All you had to do was that you have to get through their firewall.

Tiffanie | Project Manager - 14:46

Right, right.

Andre Boudreault - 14:47

And that's what you have to do. And I'd sent you the information for that by email. But I can refine my emails and resend it to you.

Tiffanie | Project Manager - 14:55

Oh, no, you had said. I thought you said you wanted to get into a meeting with me and we do it together, but I. I got that wrong. Let me open my email.

Andre Boudreault - 15:03

I'd like it. I'd like you to try it on your own first.

Tiffanie | Project Manager - 15:06

Oh, sure.

Andre Boudreault - 15:07

Because it's really simple. It's a website. It's a website. You know, it's a. It's not. Not a big deal. I just have to find my email again.

Tiffanie | Project Manager - 15:16

Let me find it.

Andre Boudreault - 15:17

See, so it might take me a minute, and then we can talk about your project and where you stand on it.

Tiffanie | Project Manager - 15:26

That's really my only bottleneck right now because I had.

Andre Boudreault - 15:31

So I was thinking about your project. I was thinking about your project quite a bit, and I have ideas of how I would maybe look into. Oh, what's going on with my computer, because I can't type. So so far, I can't type. Your name.

Tiffanie | Project Manager - 15:55

Yeah. I'm very open to hearing everything that you have as advice for that project.

Andre Boudreault - 16:05

Yeah, I was thinking about it, and I think you're biting off too much in the sense that you're designing this whole big website environment, which is, like, kind of ginormous, in my opinion. Like, if I was going to tackle this product, I'd probably put a bullet in my head.

Tiffanie | Project Manager - 16:25

I'm actually so excited about it. And because I have that coach every day, I think we can. I think we can definitely do it if I can just get through the steps. You know, I think it'll take time, like you said. For sure. But I'm excited about it.

Andre Boudreault - 16:40

But I would tackle it differently and send you an email about the way I see it in my head and the way I would approach it.

Tiffanie | Project Manager - 16:50

What did you call that? Email.

Andre Boudreault - 16:53

My little idea I had for you.

Tiffanie | Project Manager - 16:56

Yeah, can't remember, I think what you. So there's one on May 16th. I'll share my screen with you so that you can take a look at it. I think it might be this one.

Andre Boudreault - 17:11

This is mine. Are all in my scent. I didn't like move it over to a specific spot. So yes, that one.

Tiffanie | Project Manager - 17:19

Right. So yeah, tell me more about this.

Andre Boudreault - 17:22

Okay, so basically I would break things up into sections that can easily be built on. Okay. So the way I was thinking of Mike and Matt and different users is that if they receive a text, I'll may use text message instead of email, but it could be email as well. Okay, so I break the project into two different spots. I'd have a data gathering part which is just database oriented and that part would serve to create synopsis of what the data reflects. Give me an example. Give you an example. Business sales or sales, let's just call it sales. They get a text message saying the one last week did this little tree did this. These are the top categories. So they get a general view of what's going on. And then right at the end they said deeper.

Andre Boudreault - 18:30

There's a link calling it Deeper Dive.

Tiffanie | Project Manager - 18:32

Right.

Andre Boudreault - 18:33

And that link brings them directly to the page that gives them the Deeper dive, which is the page that you're developing for that section. Just purely that section.

Tiffanie | Project Manager - 18:45

I love that.

Andre Boudreault - 18:46

Then. So let's just say we've done that. Sake of argument. Two things happen. First of all, as you're giving them using Claude or using Anthropic, you're giving them a synopsis of your data gathering in pure English text. Note with the Deeper Dive button. The Deeper Dive button will then bring them to. Hey, these are the details of the categories, the sales of this, the that, all the Deeper Dive. Yeah, let's just say you accomplish that. Then you say, okay, now I need to have another data gathering that will produce a text or will add to the text I was doing before another section. And the other section is employee performance, let's say.

Tiffanie | Project Manager - 19:33

Okay.

Andre Boudreault - 19:34

Or emails that have been exchanged. Or pick a topic. So you pick a topic, you do the data gathering. It creates the synopsis that is English language readable, that contains the highlights of what you're doing. And again you have that link right at the end which is Deeper Dive. Deeper Dive brings them exactly to the webpage that you're developing. Those show them the details of what they need to see. See. And this way they don't have to log into a website. They don't have to navigate a website, they don't have to get lost in a website. You understand my point? It just brings them right to me. I call it the chocolate bar effect. You bite into a chocolate bar, you get immediate satisfaction.

Tiffanie | Project Manager - 20:18

And then if you want a deeper.

Andre Boudreault - 20:20

Dive, so getting the synopsis, if that's good enough for you move on to the next topic. And you read that topic. No, hey, what's going on with Charlotte? Charlotte's doing this. This is weird. Deeper dive, know what I mean? So then you're only going from a mic or a Mac or any user. You're only going there if you need to. So then you don't have to log into a website every day. You don't have to take ownership of having to do an action to get the data you want. You will only get the data you want, when you want it, as you want it, without remembering links, websites, this, that, so forth. You don't have to remember anything because it's right there. Deeper dive, you're done.

Andre Boudreault - 21:03

So to me, from a, I call it again my chocolate bar effect, it's more instantaneous than having to navigate through a website. The other side of this, which is the big bonus side, okay, is that you can make baby steps through your entire project and get something done at every level moving forward. So you're always accomplishing something without having to do the entire thing all at once. But you're always moving forward, you know, so then you, you create your infrastructure. Data gathering, data gathering creates synopsis. Okay, I need to have a webpage that types into the deeper dive. Okay. That's that environment for that tool. You replicate those environments time and time again for different reasons, for different points of view, for different topics. I think they're more topics.

Andre Boudreault - 22:04

And then you just replicate that over and over again based on the topic that you're trying to illustrate to the user or to the stakeholder. But you're always going to be moving forward without having to design and write the entire thing every time. So this is what I had going in my head. And then I don't have to design an entire website. I just have to design individual pages that will do the deeper dive. So then your focus is very tunnel vision to that subject matter, right? So by doing, to me, by doing so, you're basically giving the highlights and the deeper dive for each topic in one either email or text, it doesn't matter which.

Andre Boudreault - 23:01

And that can then be tailored based on the user that you're doing the Data gathering for love that to the webpage that for that type of user, they go to this page, whereas a mic would go to this other page. They're basically getting, you know, so to me, the creating little modules as you're moving forward that all basically do similar stuff in that they do data gathering, they produce the synopsis of what was gathered and then you design a webpage that ties to that so they can do a quick deeper doc. I was thinking, and I was thinking. And like I said, the beauty of it is that, number one, you're always doing little things and moving forward each step. Number two is when a new topic comes up one day, which it will.

Tiffanie | Project Manager - 23:55

Easy to replicate the module and you.

Andre Boudreault - 23:56

Say, okay, this is my methodology. I want to take this methodology. I dump it into cog code. I said, okay, based on this methodology. This is now what I want to do for data gathering. And this is the type of webpage I want you to design for me based on this data gathering. And then you say, okay, I've done another topic, I'm done with that one. And then you just keep moving on. So it's rinse and repeat basically at that point. But you're always moving forward without designing a whole big thing. And my issue with what you're designing is it could take six to eight months, if not more.

Tiffanie | Project Manager - 24:40

No, it won't take.

Andre Boudreault - 24:41

Oh, you'll see. You'll see. I've been doing this for years.

Tiffanie | Project Manager - 24:46

Depends on how busy Mike gets me with other projects he has. But if we're, if we stay committed to this, you know, as long as I can get through the next steps. So, Andre, could you tell me the email that you sent me about the server? I don't know if I have it. Is it this one?

Andre Boudreault - 25:07

Yeah, there you go. So you go to that link and you type this user with that password.

Tiffanie | Project Manager - 25:16

Remember though, I sent you an email back saying this didn't work for me. I was still blocked. Yeah, that would be amazing if I'm not. The domain is the same. So login, you're good there.

Andre Boudreault - 25:33

You've gone through the firewall, now you're good for the day. That's all you have to do.

Tiffanie | Project Manager - 25:41

Perfect.

Andre Boudreault - 25:41

Okay, so now you've gone through the firewall. So basically your IP and everything, you're good. You can go through the firewall now. You have access to everything.

Tiffanie | Project Manager - 25:52

All right, so that's all I need then. Okay, so I'm going to get working done on my projects and I'll. I'll put this meeting also into Claude and see if there's a way that I can in any way simplify my process. But I'm pretty committed to this project with the way that we kind of mapped it out. So let me get into the weeds a little bit and if I really hit like a wall, I'll raise my white flag and be like, oh, you know, let's go back to the drawing board, if that's okay.

Andre Boudreault - 26:25

That's not a problem. So now you should be able to get your coaches to help you design the CLI, to be able to access the Supabase, etc, etc.

Tiffanie | Project Manager - 26:37

Yes. And that's what I need.

Andre Boudreault - 26:38

And start doing your data gathering or stuff that you're doing with Claude with that. So that will give you that part.

Tiffanie | Project Manager - 26:45

Amazing. So, Andre, just so that I.

Andre Boudreault - 26:48

And by the way, the database is being updated every day.

Tiffanie | Project Manager - 26:52

Yes. Once the.

Andre Boudreault - 26:57

Everything's in sync on Supabase site.

Tiffanie | Project Manager - 26:59

Love that. So question for you. Now, no matter where I am, no matter what computer I'm using, I can get through the firewall. Now because of the user and password.

Andre Boudreault - 27:09

I would never take a chance. I would never take a chance. I would go back to the link. Right now you're at this IP address, you'll be in another IP address. I would always go back to the link and if you're already in, it'll say you're already in. If you're not, then you'll be in. So I wouldn't take a chance. Like, I don't have that problem because I'm always here. But. But if you're moving around, I would strongly recommend you do that.

Tiffanie | Project Manager - 27:34

Yeah. Yeah. Okay, great. So that was my only limitation at that moment. So this is really good. You've unblocked me. So thank you. Thank you so much for that. So I'll get to work and then I'll get back to you. When it comes to Global payments with Little Tree, they've sent a document for Leroy. It'll be Mike and you that let me. Let me open it so that I can show it to you. Did Matt show it to you the document that needed to be updated, or did Leia show it to you?

 Andre Boudreault - 28:05

No.

 Tiffanie | Project Manager - 28:06

Okay. Because Mike will be able to answer some of it, but the rest, I think is on you.

 Andre Boudreault - 28:14

I doubt there's. I doubt very much that. I doubt that there's very much that has anything to do.

 Tiffanie | Project Manager - 28:20

It's more giving them information. I just feel like asking Mike those things, you know, how busy it's because.

 Andre Boudreault - 28:27

I've seen these documents before in other lifetimes.

 Tiffanie | Project Manager - 28:30

Yeah.

Andre Boudreault - 28:31

Other than saying, oh, by the way, this is the name of software, we own it, blah, blah. There's really not much to say, but show me.

Tiffanie | Project Manager - 28:38

Oh, good. Yeah, let me find it. Okay, here we go. Let me share my screen with you so that you can see what I'm saying. Okay, so let me know if you can see this pop up right here. Do you see the pop up in the green? So, legal name. That's Mike. Legal business address. That's Mike. Operating. That's Mike. What is the business location? Mike. Home address. That's Mike. Signers. Mike. Void check will be Rebecca. Gas or hydro bill. Also Rebecca. Vehicle registration. Manual volume is Rebecca. Okay, so now we have POS related questions. Are you currently using a standalone device within the business location to accept transactions, or do you have a POS System?

Andre Boudreault - 29:27

That's pretty easy. You have a POS system.

Tiffanie | Project Manager - 29:30

So this, this, this.

Andre Boudreault - 29:34

Do you think these are all. These are all.

Tiffanie | Project Manager - 29:36

These are all like, like basic questions. Yeah.

Andre Boudreault - 29:40

One question. So you have a POS System. Yeah, basically, that's what we have. What's the name of the software?

Vendicio.

Tiffanie | Project Manager - 29:48

Oh, you know what? Let's just do it together. That way you don't have to do this on your apps. Okay, so the POS system is.

Andre Boudreault - 29:55

Yes. Vendicio.

Tiffanie | Project Manager - 29:58

Yep.

Andre Boudreault - 29:58

Is the name of the software.

Tiffanie | Project Manager - 30:00

Perfect. And then number three. Do we have a page of pump?

Andre Boudreault - 30:04

Yes. Well, no, this is a Bullock, I think you're using. Bullock.

Tiffanie | Project Manager - 30:12

Bullock. Okay.

Andre Boudreault - 30:13

Believe so.

Tiffanie | Project Manager - 30:16

I'm sure you're right. You have such a good memory for those things. If you do not have paid the pump or you're looking for luck, do.

Andre Boudreault - 30:22

You find yourself so. Yes.

Tiffanie | Project Manager - 30:25

Yes.

Andre Boudreault - 30:25

Perfect. Do you accept Fleet cards? That's a business thing from Mike. I don't know if he does or if he doesn't. I have no idea.

Tiffanie | Project Manager - 30:33

Okay, so I'll ask Mike that. Okay, great. So let me download this as a PDF.

Andre Boudreault - 30:38

There's nothing. There's. I told you there'd be nothing really? For me. Not really.

Tiffanie | Project Manager - 30:43

You answered it. So it's yes. Vendicio paid the pump. Yes. Bullock. Yes. This is not applicable. And then Fleet card is. I have to ask Mike, right?

Andre Boudreault - 30:53

Yeah. Because I don't know if they've set fleet cards or not. Fleet card. You know what those are, right? I have no idea.

Tiffanie | Project Manager - 31:00

No idea.

Andre Boudreault - 31:02

Okay, so I own it. I own a trucking company. I own a delivery company that has seven trucks. Okay. And I have a Fleet card, one per truck and they can gas with it. So they, that's how they pay. And then the company pays the bill, obviously, at the end of the day.

Tiffanie | Project Manager - 31:19

Right, okay, that makes sense.

Andre Boudreault - 31:20

Consider it a fleet card.

Tiffanie | Project Manager - 31:22

Oh, perfect. Okay, awesome.

Andre Boudreault - 31:24

I don't know if Mike accepts those or not.

Tiffanie | Project Manager - 31:27

Okay. Okay, sounds good. So I'll get. Mike is coming back to Montreal today. He's actually on a flight right now, so I'll get him to answer. I'll probably answer as much of this that I can for him.

Andre Boudreault - 31:39

There's a lot of it. You can just throw it at Rebecca and she'll. She'll give you all the info.

Tiffanie | Project Manager - 31:45

I feel bad for Andre. She's so busy. So, so busy. And she doesn't have a lot of support.

Andre Boudreault - 31:51

And a lot of this can be answered by Mike's mom. She knows.

Tiffanie | Project Manager - 31:55

And I think Mike's assistant too. I think Leah could be able to help me a little bit with this, so I'll send it off to her. I'm really excited to start with this, by the way. Really, really excited. So I'm gonna get started on that and then I'll. I'll send you a little update by the end of the week to let you know how it's going, how I'm doing, and get your feedback on a few things and yeah, it's going to be a great week. Thank you so much for all of your help. When are we seeing you, by the way? Are we doing the.

Andre Boudreault - 32:28

You're not seeing me.

Tiffanie | Project Manager - 32:29

I meant like, in person. I feel like I've been talking to you for like, what, it's been six months now, I think, and I haven't met you in person.

Andre Boudreault - 32:38

It's coming. I'm just gonna say it's coming. I just gotta get. I just gotta get out of my little funk of med box right now.

Tiffanie | Project Manager - 32:46

Because I hear you. I hear you. You're really busy.

Andre Boudreault - 32:51

I've gotta get. I've gotta get them in sync. I don't think they understand. Like, like, I'm very disappointed. They want to go live on probably one of the biggest sales day of the year. That would be suicidal.

Tiffanie | Project Manager - 33:08

Oh, my God.

Andre Boudreault - 33:09

Well, you know, July 1st, there's the Oka camping.

Tiffanie | Project Manager - 33:12

There's.

Andre Boudreault - 33:13

There's all sorts of activities around Oka on June 24 and July 1. Who in their right mind would go live one of those days? Not me. So I'm trying to have a discussion with Matt. I'm supposed to see him on Friday morning because he's bringing over that kiosk thing. So I've already told him by text, I. They're making a mistake. But we'll see.

Tiffanie | Project Manager - 33:38

Good luck. I'm sending all the positive good luck.

Andre Boudreault - 33:42

Because the night before they go live, I have to reload all their own hand values, their points. Values. I have to reset the system. I have to make sure. Because right now they're in kind of a sandbox scenario. I have to load the sales that I'd be missing from the other system. I have a lot of things to do, starting at 11 o'clock at night, the night before they go live. And then. So I've got all that work to do and then you want me on site on July 1, when things might blow up. No, not doing it that way, you know, so I've got to convince them.

Tiffanie | Project Manager - 34:17

Yeah.

Andre Boudreault - 34:18

Well, no, because otherwise, I mean. I mean, there are limits to how you can stretch that rubber band.

Tiffanie | Project Manager - 34:26

You know, a good expression. There are limits to how you can stretch that rubber band. Okay, I'm stealing that one, too. You've given me a lot of really good analogies that I still.

Andre Boudreault - 34:38

My personal favorite is the. Well, it's a French one, but you translate into, don't trip over the flowers in the carpet. I like that one a lot because people overthink things. They trip over the flowers in the carpet. You gotta stop them at some point.

Tiffanie | Project Manager - 34:56

I love that. I love that. Well, I'm gonna get my favorite bar.

Andre Boudreault - 35:00

One quickly, before we go. My favorite bar one.

Tiffanie | Project Manager - 35:03

Yes.

Andre Boudreault - 35:05

There's always idiots at the bar. Right?

Tiffanie | Project Manager - 35:08

Right.

Andre Boudreault - 35:08

So let's say an idiot starts arguing with you. Say, look, you wanna take it outside? Go outside. If I'm not there in two minutes, start without me.

 Tiffanie | Project Manager - 35:20

Oh, that's so funny. Oh, my gosh.

 Andre Boudreault - 35:22

And then they start laughing and the argument is over.

 Tiffanie | Project Manager - 35:25

Oh, I love that. What a good way of, like, using a bit of cleverness and a bit of humor to diffuse a confrontation.

 Andre Boudreault - 35:32

And then you're out. And like I said, there are idiots in all bars, so that's the one I go with.

 Tiffanie | Project Manager - 35:40

Love that. Love that. Thank you so much for your time today and every day as usual. I'll see you soon.

 Andre Boudreault - 35:45

Have a great walk today. It's beautiful out there.

 Tiffanie | Project Manager - 35:48

Beautiful. I agree. I hope you get outside today, too, a little bit, even though I know.

Andre Boudreault - 35:52

You're very busy, technically speaking. And I am not holding my breath on this one. Carla might pop by this afternoon.

Tiffanie | Project Manager - 36:00

Did you?

Andre Boudreault - 36:01

But I'm not holding. But I'm not holding my breath.

Tiffanie | Project Manager - 36:04

Okay, I Haven't wanted to ask out of respect, but is that. How's that going? But good, like, good progress, you know? You got through the window? Is that what.

Andre Boudreault - 36:23

Yeah, yeah. The door was closed. The windows got opened. I got through the window. But I. I still have a lot of demons that. Things that are. That are bugging me, so I've got to figure it out, that's all.

Tiffanie | Project Manager - 36:35

Yeah.

Andre Boudreault - 36:36

And I, I, you know, and sometimes I just don't feel like bringing it up because just don't. Don't feel like it. But I haven't. I haven't. I. I haven't. I. I can't bring it up sometimes because otherwise I'll just get over the top. So I. I hope that.

Tiffanie | Project Manager - 37:00

Yeah, I hope that she creates a safe space for you where you see, feel like you know.

Andre Boudreault - 37:08

No, I don't want to do that. I don't want to bring it up today. I just want to have, like, you.

Tiffanie | Project Manager - 37:12

Know, a good time together.

Andre Boudreault - 37:14

Just hang out and do like, like, bubble stuff. I don't feel like doing anything.

Tiffanie | Project Manager - 37:20

Yeah. Yeah. Is he coming over in the afternoon or is it in the morning?

Andre Boudreault - 37:24

I said I'm not holding my breath because I don't know the timing on that either, so.

Tiffanie | Project Manager - 37:28

I hear you.

Andre Boudreault - 37:30

Well, if you want, pick a time of day. If possibly, perhaps maybe it happens, you know, that's the way I feel.

Tiffanie | Project Manager - 37:39

Would you like Mike's assistant to send you a bouquet of flowers today that you could give?

Andre Boudreault - 37:46

I get her flowers every week. Every week. Darling.

Tiffanie | Project Manager - 37:51

That's so nice. That's so nice.

Andre Boudreault - 37:53

Every week.

Tiffanie | Project Manager - 37:55

That's so nice.

Andre Boudreault - 37:56

She sent me a picture, like I get her usually on Tuesday or Wednesday, flowers and. Okay, obviously.

Tiffanie | Project Manager - 38:03

And.

Andre Boudreault - 38:05

The one I got her last Tuesday, she sent me a picture of it yesterday, I believe it was. And it was still absolutely gorgeous.

Tiffanie | Project Manager - 38:16

Those things really matter. So it's so nice that you're so aware of that. I'm happy for you and for her.

Andre Boudreault - 38:22

It's a thing, you know? And the way I think about it is that when she wakes up in the morning, it should put a smile on her face.

Tiffanie | Project Manager - 38:30

Yes. It smells good. It's beautiful and it's thoughtful. You know, it's all the things we. We need, you know? Yeah, that's really nice. Okay, well, give me parson. I'm sending you all the positive. Good luck to you. I hope she comes over. Yeah. And I'll let you know.

Andre Boudreault - 38:47

I'll let you know.

Tiffanie | Project Manager - 38:48

Okay.

Andre Boudreault - 38:50

Have a great day.

Tiffanie | Project Manager - 38:51

You do. Bye.

Andre Boudreault - 38:53

Be good. Bye. Bye.
